# 01 Introduction

Superplants provide a comprehensive decorated Christmas tree service, supplying interior artificial trees and fresh cut trees for both indoor and outdoor locations.

Our interior fresh cut trees are available in a range of sizes up to 15ft tall, and we offer a variety of decorations in colours to suit your taste or corporate branding. We will then deliver, install and decorate your tree for you to enjoy over the festive season.

We also supply exterior fresh cut trees up to 25ft tall for town centres and businesses, as well as smaller trees for brackets on high street buildings.

All of our fresh cut trees are sourced from sustainable plantations, and after the festive season we recycle the trees at our nursery for use as top mulch dressing for exterior grounds maintenance projects, so nothing goes to waste.

## 02

# Interior Fresh Cut Christmas Trees

Superplants offer low-drop, premium quality Nordmann interior trees for rental over the festive period. Trees are available from 1.8m (6ft) to 4.5m (15ft) tall for interior use.

We can dress your tree with lights and decorations with a variety of colours to choose from. Whether you're looking to match your corporate branding, or you'd prefer a traditional colour scheme, we offer a choice of styles to suit you. In addition, we can supply wrapped decorative parcels, swags, garlands.

We advise delivery of trees early December to ensure longevity, preferably after 6<sup>th</sup> December and remove them after Christmas before the twelfth night. After Christmas, we will collect your tree and recycle it at our nursery.

# 03 Interior Artificial Trees

We supply high quality, inherently fire retardant artificial Christmas trees for hire over the festive season. Our artificial trees are available in heights from 6ft - 12ft, and are supplied on their own stand.

As with our live trees, we offer a variety of decorations and colour schemes to choose from and lights to complement, and can provide wrapped parcels and additional swags and garlands.

Artificial trees are a fantastic alternative to live trees and are great for areas where live trees are not suitable or practical. They are also great for venues where trees are required for exceptionally long periods of time – no dropping of needles, and no watering required!

Installations for artificial trees are available from mid November onwards.

# 04 Exterior Fresh Cut Trees

We supply large 7m (25ft) tall Norway Spruce Christmas Trees for town centres and businesses in London and the South. We will select the tree from the plantation, transport it to site, crane it into position and add lights and decorations if required. If you are interested in trees over 4.5m tall, please contact us as early as possible to ensure we can select and reserve a suitable specimen from the growers.

We also supply, install and decorate smaller trees for displays in town centres. These trees are normally erected in late October/early November in readiness for Christmas light switch-on events, and we can return after Christmas to remove trees for recycling.

We manufacture Christmas tree brackets which fix to the exterior of the buildings. Additionally, we can supply exterior garlands and wreaths bespoke to your requirements.

*"I just wanted to say a huge thank you for the amazing Christmas Tree you provided us with this year, it was stunning. As always delivering us the best of the best."*

*O'Melveny & Myers*

*"On a personal level you have been great to work with David. You make the organising of our Christmas Trees each year so easy and have given one of the best services I have ever experienced from a supplier."*

*LV*

*"Thank you again for lovely Christmas trees in our office - they have been and still are absolutely beautiful."*

*Just Eat*
